

FLUIDMASTER® 7516 WAX BOWL GASKET WITH FLANGE INSTALLATION INSTRUCTIONS

INSTALLATION INSTRUCTIONS:

- Be sure wax gasket is at least 70°F temperature to insure proper flow of wax.
- Press wax gasket over horn outlet of toilet bowl, extending plastic flange away from the bowl.
- Set bowl in place and use body weight to compress wax gasket.
- Twist bowl slightly to spread wax.
- Tighten bolts (not included) carefully to prevent breaking the bowl.

Extends short horn bowls.
Eliminates capillary action.
Will not harden or deteriorate.
Fits all 3" and 4" waste lines.
Provides positive bowl alignment.
Forms a gas-tight, odor-tight and watertight seal.
