THANK YOU FOR CHOOSING KALLISTA

We appreciate your commitment to Kallista quality products. Please take a moment to review this manual before you install your Kallista product. If you encounter any installation or performance problems, please do not

hesitate to contact us at the phone number listed at the bottom of the page.			
BEFORE YOU BEGIN			
 Prior to installation, unpack the faucet and drain and inspect it for damage. If the product is damaged, please contact Kallista immediately at the phone number listed at the bottom of the page. Shut off the main water supply. Observe all local plumbing and building codes. If possible, install the faucet to the lavatory before installing the lavatory. Kallista reserves the right to make revisions in the design of plumbing products without notice, as specified in the Price Book. 			
TOOLS AND MATERIALS			
Hex Wrench	Adjustable Wrench	Thread Sealant	Plumbers Putty
1. INSTALL HOSES INTO THE FAUCET			
 Insert the lift rod in small hole in escutcheon. Slide escutcheon up to bend in lift rod. Ensure that O-ring is installed in bottom of escutcheon. Feed the hoses through the escutcheon one at a time. Install escutcheon onto bottom of faucet, guiding lift rod into slot in back of faucet. Install the mounting stud into the bottom of the faucet. 			Lift Rod Escutcheon O-ring Mounting Stud
