

Please Note:

- All Kuzco LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) dimmer is required.

START FROM HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Technical Support: 1-855-855-8926

1. Remove the fixture from its original packaging and remove the mounting plate from within the hardware package. Now secure the mounting plate **(1a)** to the box using the two machine screws **(1b)**.
2. Attach all wiring **(2a)** with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Next, attach the fixture **(2b)** to the mounting plate by threading the two set screws **(2c)** until the fixture is secured to the ceiling.
3. The next step is to install the cup diffuser onto the fixture. With one hand, push the cup diffuser **(3a)** up against the underside of the fixture **(2b)** and thread clockwise. Caution, do not use excessive force.
4. You have now completed the installation of your fixture, enjoy.
