IMPORTANT:
We use very fine clay to produce select porcelain lavatories.
The many benefits of fine clay include low porosity, high brilliance
of glaze, as well as high durability of the material and finish.
However, fine clay is subject to relatively high level of shrinkage
12-15% during firing process at extremely high temperatures
reaching over 2200°F / 1200°C. This process results in
unavoidable low levels of deviation from the originally intended
perfect shape. Each lavatory is therefore slightly unique
and closely inspected for proper fit with the accompanying vanity.
LACAVA strives to ensure long-lasting beauty and performance
of our sanitary ware for complete customer satisfaction.

Notes:
Drawings provided herein are meant to give the user an idea of the
product and are not made to scale. The size in inches is rounded up
to the nearest 1/16". Slight variances can often occur with porcelain and
woodwork. Therefore, LACAVA will not be held responsible for any cutouts,
countertops, or furniture made without the actual product or template
from LACAVA.

Plumbing specifications are only a guideline and may need to be altered
based on the application.
Product specifications are not binding to the manufacturer and can
be changed without notice at any time. Please refer to your shipment
for product final sizes.

LACAVA is committed to the highest level of customer service. Please feel
