Product Specifications:

IMPORTANT:

We use very fine clay to produce select porcelain lavatories. The many benefits of fine clay include low porosity, high brilliance of glaze, as well as high durability of the material and finish. However, fine clay is subject to relatively high level of shrinkage 12-15% during firing process at extremely high temperatures reaching over 2200°F / 1200°C. This process results in unavoidable low levels of deviation from the originally intended perfect shape. Each lavatory is therefore slightly unique and closely inspected for proper fit with the accompanying vanity. LACAVA strives to ensure long-lasting beauty and performance of our sanitary ware for complete customer satisfaction.
