Unique Nature of Concrete

Our handcrafted concrete sinks celebrate their natural, unique character, featuring variations in color, texture, pores, lines, seams, and small surface holes caused by trapped air during casting - all of which are inherent and do not compromise durability. Made from traditional mixes of gravel, crushed stone, sand, and cement, each piece is individually crafted, resulting in one-of-a-kind products with organic, stone-like qualities and a rich patina, emphasizing the beauty of natural imperfections. These features, including visible aggregates, subtle cracks, and color and texture variations due to the mixing process and curing, are natural to concrete, highlighting its authentic and artisanal nature. Please consider your comfort level with these distinctive characteristics before placing an order, as each sink will be unique in nature and slightly different from the photography shown on our website.
