

Transparent Surface Tubs

Caution

- Carefully read the instructions before starting the installation.
- This bathtub should be installed by an experienced plumber.
- You will need at least two people to install this product properly.
- In order to reduce the risks of personal injuries, do not support or lift the bathtub by the rim. Provide adequate support under the feet.
- Manufacture is not responsible for any damage to the unit or personal property caused by improper installation. If you disregard instructional warnings, you will void your warranty.
- Unpack and inspect the bathtub for damage. Return the bathtub to the carton until you are ready to install.
- Install the bathtub on an adequately supported, level floor.
- Before installation, ensure proper access to the final plumbing connection.
- Adhere to all local plumbing codes

Installation Manual

1. Remove the bathtub from its carton and place it on a protective floor covering material to prevent damage to the bathtub or floor.
2. Position the tub in its final location and trace its outline with a pencil.
3. Position a clean drop cloth or similar material in the bottom of the bathtub. Be careful not to scratch the surface of the bathtub.
4. Level the bath by turning the leveling feet at the bottom of the tub.
5. If the drain waste pipe is not directly below the drain please use an adjustable flex pipe (not included) and follow steps 6-10 otherwise if not please continue down to straight drain installation steps 11.

Using Flex Pipe (not included)

6. Place tub on its side and connect flex pipe to the Tub drain pipe using the lock nut connector.
7. Arrange the flex pipe and connect its end to the drain waste pipe.(use PVC cement to connect)
8. Flip over the bathtub.
9. Fill the bathtub to the overflow and check for leaks.
10. Affix the bathtub by applying silicone on the contour of the base. Let dry 24h.

Straight drain Installation

(Requires a RapidConnect Drain *sold separately OR access below the floor, OR must be built on a platform)

11. Connect the drain directly to the drain waste pipe. (Straight drain tail piece not included)
12. Flip over the bathtub.
13. Fill the bathtub to the overflow and check for leaks
14. Affix the bathtub by applying silicone on the contour of the base. Let dry 24h.

Transparent Surface Tubs

Care and Maintenance

- After using the bathtub, clean it with a soft cloth and warm, soapy water.
 - This will remove any oils or soap and prevent tide marks from forming.
- Only use mild liquid detergents and warm, soapy water to clean the bathtub. Do not use powders, pastes, creams, chemicals, window cleaning sprays, or abrasive cleaners.
- Cream cleaners can only be used to remove stubborn marks.
- Scratches can be removed with a fine polish sand foam.

Damage Prevention

- Once your bath has been installed, fill the bathtub with cold water to allow the bath to gradually adapt to the temperature.
- Do not use powders, pastes, crème cleaners, thinners or dry-cleaning fluids.
- Deliver water (mixed hot and cold) to the lowest point of the bath which is at the waste area
- Avoid contact with strong chemicals and solvents (stain removers, nail varnish removers, Etc)
- Wipe away any chemical spillages. Example: hair dye, as soon as possible to avoid potential staining.
- When colored essential oils or bathbombs are used, first test that the color will not stain your bath. If it does, a burnishing compound will remove it.
