Dear Customer,

We thank you for choosing our product.

MGS Solid Stainless Steel faucets are manufactured in Italy by expert artisans. The product has been assembled, inspected and packaged with maximum attention and care.

The Matte and Polished finishes are obtained by hand polishing: a skilled touch to enhance the natural beauty of this noble metal.

All products are therefore alike, but not identical:
a synonym of exclusivity.

We use high grade AISI316L marine stainless steel that does not require any protective finish to be applied to the surface. Following the simple care instructions will allow you to keep your **MGS** faucet beautiful for a lifetime.

INSTALLATION WARNING

1. Never use teflon tape for out-of-the wall threaded connetions. Use provided contents only. Not complying with this instruction could damage the product and generate leakage.
2. Observe all local plumbing codes.
3. Inspect water supplies for signs of damage. Replace if necessary.
4. Flush through the supply pipes.

Tools

#3 PHILLIPS SCREWDRIVER

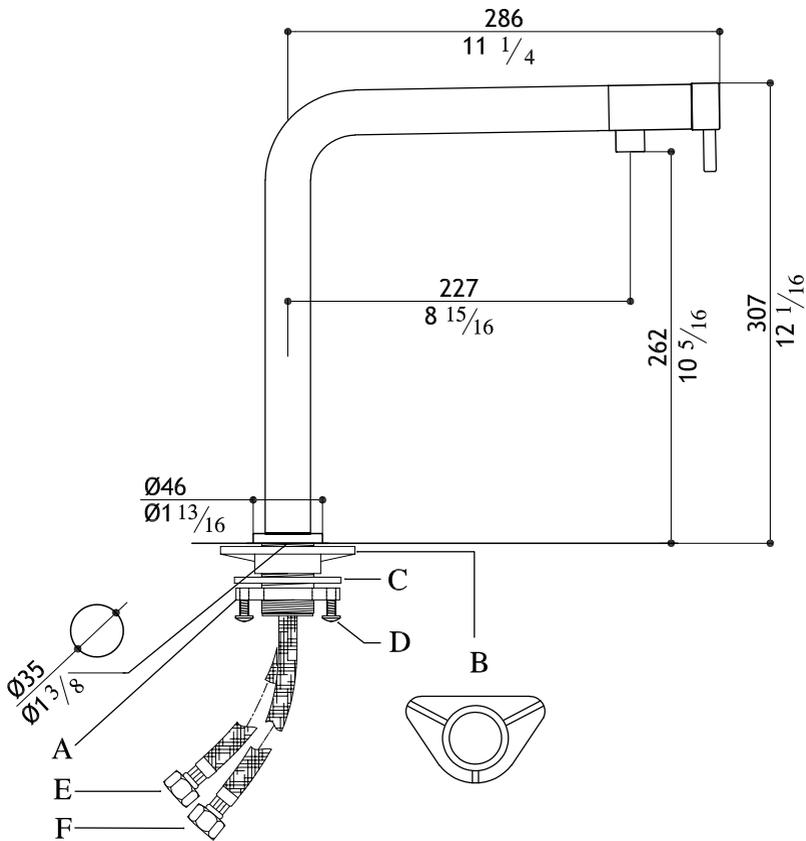

ADJUSTABLE WRENCH

ADJUSTABLE PLIERS

Technical data

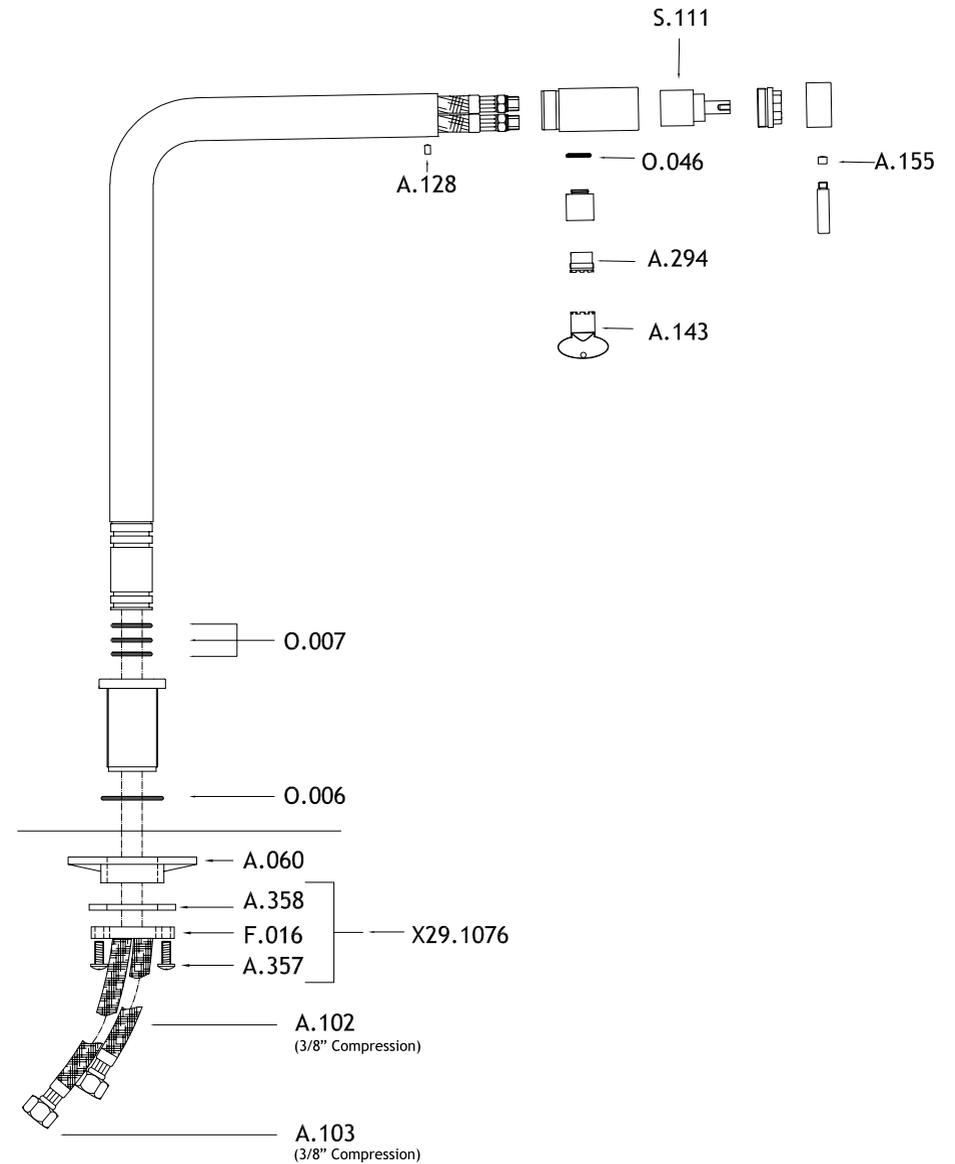

Operating Pressure:	max 145 PSI (10 bar)
Recommended operating pressure:	14 to 43 PSI (1 - 5 bar)
Maximum hot water temperature:	185 °F (85°C)
Recommended hot water temperature:	149 °F (65°C)

INSTALLATION

1. Fully unscrew nut (A).
2. Place the mixer on the sink.
3. After positioning reinforcement plate (B) and washer (C), fully hand screw nut (A) against washer (C) and tighten with the 3 screws (D).
4. Connect flexible hoses (E) and (F) to the mains (red for hot water and blue for cold water).
5. We recommend to install between the mains and the faucet a water filter which should regularly be cleaned.

Spare parts

Do not force spout rotation for preventing damage to feeding hoses.

CARE & MAINTENANCE

Matte and Polished Stainless steel

In order to preserve the finish of your product, we recommend regular cleaning with a soft wet cloth. For regular cleaning it is not necessary to use detergents. In case of need, we recommend the use of a mild detergent or even better, a specific stainless steel detergent. In this case, please follow the specific instructions of the detergent manufacturer. When using a detergent rinse well with water immediately after cleaning, until all detergent is removed from the surface. Dry with a soft cloth.

PVD finishes (Black Steel / Titanium / Rose Gold / Gold)

PVD technology is used to create a smooth, resistant and long lasting finish. A soft wet cloth is sufficient for daily cleaning.

For resistant stains and fingerprints we recommend the use of a diluted mild soap and water solution to be applied using a soft cloth. Rinse thoroughly after cleaning. In order to avoid water stains we recommend to dry the surface with a soft cloth.

As it is not a coating but the result of a chemical reaction, a characteristic of PVD is that objects of different shapes and dimensions can absorb color differently, resulting in slight color variations. These are not to be considered defects.

All finishes:

DO NOT use bleach, caustic, ammonia or acid based cleaning materials or detergents containing chloride, or any other strong household cleaning products, even if organic. Even vapors of such products could damage the chemical balance of the stainless steel surface. When using strong chemical products in the room, we recommend to air it out. DO NOT use abrasive materials, cleaning pads, scouring sponges, files or other hard objects. DO NOT use oily rags or greasy cloths when wiping the product surface.

Cleaning the aerator

Depending on the hardness and quality of water in your household, the aerator may become clogged. We recommend to clean the aerator the first time a few days after the installation, then every six to twelve months depending on the water quality.

To clean the aerator proceed by thoroughly rinsing it under running water until all debris is removed. In case of persistent limescale or debris, we recommend to immerse the aerator for several hours in a water and vinegar solution, or in anti-limescale solution.

Outdoor installation

Marine grade stainless steel is ideal for outdoor installation and it is extremely resistant to oxidation. Nevertheless, it is not oxidation proof or stain proof.

In order to maintain the long lasting beauty of the stainless steel surface it is necessary to regularly clean it. This is particularly important in marine environment where saline deposits over time will affect the surface and cause oxidation. In such conditions the surface must be cleaned more frequently in order to be preserved.

WARRANTY

MGS products installed in a residential indoor application are covered by a limited 5 year functional and finish warranty from purchasing date. During this period, parts with construction defects in material or workmanship will be replaced free of charge. This warranty is subject to the warranty conditions and limitations as set forth below.

This warranty will not cover faults caused by unsuitable or improper use, incorrect installation, natural wear, improper or careless treatment, incorrect usage of cleaning or maintenance products.

MGS will not assume liability for labor expended, freight cost or damages accruing from the use of the material purchased from us. If material is defective, MGS will either supply the replacement part or it will reimburse the price of the defective material.

Proof of purchase (original sales receipt) from the original consumer purchaser must be made available to MGS for all warranty claims. The warranty is not transferrable and is extended solely to the original purchaser of the product.

MGS products installed outdoor and/or for commercial applications are covered by a 2 year functional and finish warranty from purchasing date.

This warranty applies to MGS faucets installed in USA or Canada.

LIBRETTO ISTRUZIONI

MGS Progetti srl vi ringrazia per aver scelto questo suo prodotto. I rubinetti **MGS** sono realizzati in acciaio inossidabile e vengono lucidati e spazzolati a mano per far risaltare la naturale bellezza e preziosità del metallo. Ne consegue che, seppur simili, i nostri rubinetti non sono mai identici. Il vostro rubinetto **MGS** sarà sempre nuovo anche dopo anni di utilizzo: basterà lucidarne la superficie con un prodotto idoneo alla pulizia dell' acciaio inossidabile.

MGS Progetti srl dankt Ihnen für den Kauf dieses Produktes. **MGS** Armaturen aus Edelstahl sind exklusiv und werden von Hand poliert und gebürstet, wodurch die schöne natürliche Oberfläche dieses edlen Metalles erzielt wird. Alle Produkte sind daher gleich, aber nicht identisch, auf jeden Fall etwas Besonderes. Ihre **MGS** Armatur wird lebenslang unverändert bleiben, wenn Sie die Oberfläche mit einem für Edelstahl geeignetem Reinigungsmittel polieren.

MGS Progetti srl would like to thank you for choosing this product. **MGS** stainless steel faucets are hand polished and brushed for obtaining the beautiful natural finish of this noble metal. All products are therefore alike but not identical, synonymous of exclusivity. Your **MGS** faucet will stay beautiful for a life-time by just polishing its surface with a cleaning product suitable for stainless steel.

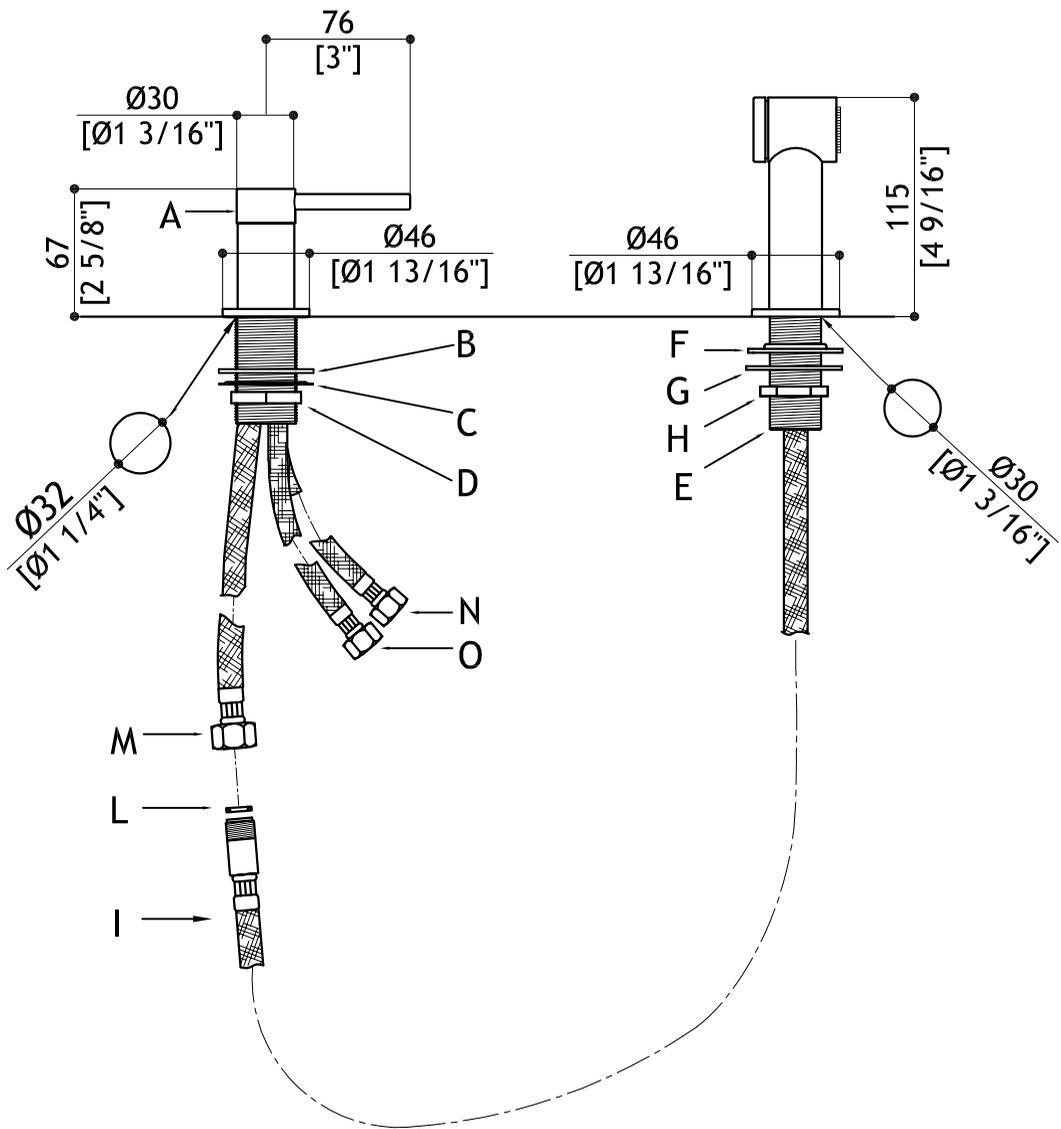

MGS Progetti srl vous remercie pour avoir choisi votre nouveau robinet en acier inoxydable. Les robinets **MGS** entièrement brossés et polis à la main font ressortir la préciosité de l'acier inoxydable qui maintient sans limites de temps sa beauté naturelle. Il s'ensuit que les robinets **MGS** ne sont jamais identiques et que chaque pièce est pratiquement unique. Votre robinet **MGS** sera toujours nouveau même après des années de service et il suffira pour le raviver de le polir de temps en temps avec un produit approprié.

MONTAGGIO:

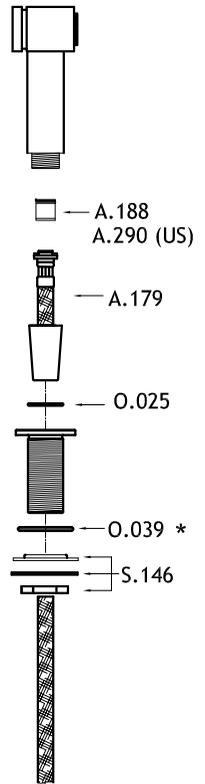

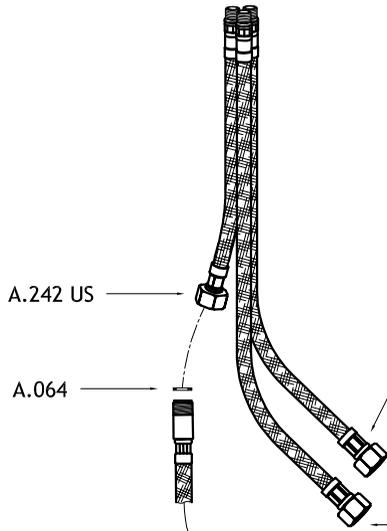

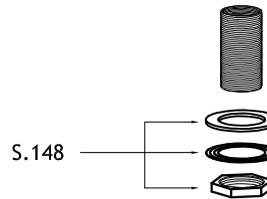

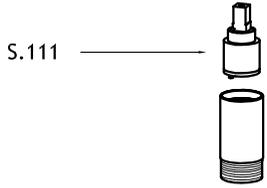

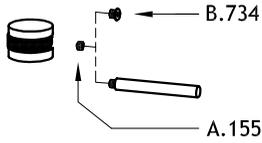

1. Spurgare bene le tubazioni di alimentazione.
2. Posizionare il corpo (A) nel foro del top.

Condizioni di garanzia

Le parti in acciaio dei rubinetti MGS sono garantite per 5 anni, mentre gli altri componenti per 2 anni (cartucce, flessibili, ecc.). Durante il periodo di garanzia tutte le parti riportanti difetti dovuti a vizi di fabbricazione saranno sostituite gratuitamente. Questioni legate a un utilizzo anomalo o inadeguato, installazione difettosa, normale usura, uso negligente o errato, impiego di prodotti per la pulizia inadatti e a danni di trasporto non sono coperte dalla garanzia. MGS non è responsabile per eventuali costi di intervento al domicilio del cliente finale. In caso di difetto il limite del danno rimborsato è definito dal prezzo del materiale difettoso. L'acquirente per avere diritto alla garanzia deve dimostrare la data di acquisto con la prova di acquisto originale.

Garantie

Auf MGS Produkte gewähren wir Ihnen 5 Jahre Garantie ab Kaufdatum für alle Edelstahlteile und 2 Jahre für alle anderen Komponenten. Während diese Zeitraums werden alle Teile, die einen Konstruktionsfehler aufweisen, kostenlos ersetzt. Diese Garantie wird nicht gewährt bei unsachgemäßem Gebrauch, falscher Montage, nachlässiger Handhabung, falscher Anwendung von Reinigungsmitteln und fehlender oder mangelhafter Wartung. MGS ist nicht verantwortlich für eventuelle Eingriffskosten zu Hause des Kunden. Im Schadenfall entspricht die Rückerstattung des Schadens dem Preis des defekten Materials. Die Garantie ist nicht übertragbar und der Käufer muss Kaufdatum und Originalquittung vorweisen.

Warranty

MGS products are covered by a warranty of 5 years from purchasing date on all stainless steel parts and of 2 years on all other components. During this period, parts with construction defects in materials or workmanship will be replaced free of charge. This warranty will not respond in the case of faults caused by unsuitable or improper use, wrong installation, natural wear, improper or careless treatment, wrong usage of cleaning or maintenance products. MGS will not assume liability for labour expended, freight cost or damages accruing from the use of the material purchased from us. If material is defective, the limit of damage is the price of the defective material. Proof of purchase (original sales receipt) from the original consumer purchaser must be made available to MGS for all warranty claims. The warranty is not transferable and is extended solely to the original purchaser of the product.

Garantie

Les robinets MGS sont garantis pour une période de 5 ans pour toutes les parties en acier inoxydable et de 2 ans pour les autres composants. Pendant la période de garantie toutes les parties avec un défaut de construction seront remplacées gratuitement. La garantie n'a plus de validité dans les cas de mauvaise utilisation tels qu'installation défectueuse, usage impropre, mauvais nettoyage, etc. de même pour les dommages de transport et la normale usure. MGS n'est pas responsable pour les frais d'intervention au domicile du client final. Lorsqu'un robinet est défectueux la limite du défaut ne peut pas dépasser le prix de la pièce défectueuse. La garantie commence à la date d'achat du robinet et la facture originale est nécessaire afin d'établir la validité de la garantie.
