Produits Neptune

1

Parts required:

Pieces requis:

Partes requeridas:

A. Place the wall jamb over the threshold and against the walls. Verify that it sits on the flat side of the threshold and firmly against the wall. Level.
B. Mark the position of the wall jamb holes on the shower wall.
C. Remove the wall jamb from the shower.

A. Mettre le montant mural sur le seuil et contre le mur. Vérifier que le montant se trouve sur le côté plat du seuil et fermement contre le mur. Mettre de niveau.
B. Marquer la position du montant mural sur le mur de la douche.
C. Enlever le montant du bain.

A. Colocar el montante sobre el nicho y contra el muro. Verificar que el montante se encuentre sobre el lado plano del nicho y apoyado firmemente contra el muro de la ducha. Nivelar.
B. Marque en el muro de ducha la posición de la jamba mural.
C. Retirar el montante de la ducha.

If the angle between the base and the wall is rounded you may have to grind the lower corner of the frame to fit in the shower.

Si l'angle entre la base et le mur est arrondis, vous devrez peut-être limer le coin inférieur du cadre pour s'adapter à la douche.

Si el ángulo entre la base y la pared es redondeado puede que tengal que moler la esquina inferior del marco para caber en la ducha.

2

Parts required:
Pieces requis:
Partes requeridas:

A. Drill the holes on the previously marked positions.
B. Place the wall jamb on the shower wall, fill the holes with silicone and fasten with the provided screws.
C. Apply a bead of silicone at the bottom on the inside of wall jamb.

A. Percer les trous marqués précédemment.
B. Mettre le montant mural sur le mur de douche, remplir les trous avec du silicone et fixer avec les vis fournies.
C. Appliquer un cordon de silicone au fond à l'intérieur du montant.

A. Perforar los huecos en las marcas hechas previamente.
B. Colocar el montante sobre el muro de ducha, llenar los huecos con silicona y fijarlo en posición con los tornillos suministrados.
C. Aplique un cordón de silicona en la parte inferior en el interior del montante mural.

If no studs are behind the wall covering use the wall anchors when fastening the wall jamb.

S'il n'y a pas de montants derrière le mur, utiliser les ancrages afin de fixer le montant mural.

Si no hay montantes detrás del revestimiento, use anclajes para sujetar la jamba mural.

3

Parts required:

Pieces requis:

Partes requeridas:

Insert fixed panel into wall jamb. Ensure it is level. Insert wall jamb gasket on the inside of the wall jamb.

Insérer le panneau fixe dans le montant mural. Assurer qu'il soit de niveau. Insérer l'étanche du montant mural à l'intérieur du montant mural.

Inserte el panel fijo en el montante mural. Asegúrese de que esté nivelado. Inserte la junta del montante mural en el interior del montante.

4A

Parts required:
Pièces requis:
Partes requeridas:

Line up horizontal arm with the wall and the fixed panel. Measure the overhang, remove 5/16" from this measurement, and cut the support arm by this value. Replace the support arm, make sure it is level, and trace the outside of the wall bracket onto the wall.

Aligner le bras horizontal avec le mur et le panneau fixe. Mesurer le surplomb, enlever 5/16 po de cette mesure, et puis couper le bras horizontal par cette valeur. Remplacer le bras horizontal, assurer qu'il soit de niveau, et tracer le périmètre du support de mur sur le mur.

Alinear el brazo horizontal con la pared y el panel fijo. Medir el voladizo, restar 5/16" de esta medida y corte el brazo de soporte según ese valor. Volver a colocar el brazo de soporte, asegurarse de que esté nivelado y trazar el contorno exterior del soporte de pared en la pared.

5A

Parts required:

Pieces requis:

Partes requeridas:

2.5mm

Remove the horizontal support arm and mark the hole in the wall bracket. Drill the hole with a Ø6mm bit, and if there is no stud behind the wall, add silicone and a wall anchor into the hole. Screw the wall bracket in place, then use the allen key to loosen the arm bracket from the wall bracket. Insert the horizontal arm into the arm bracket.

Enlever le bras horizontal et marquer le trou dans le support mural. Percer un trou avec une mèche Ø6mm, et s'il n'y a pas de poteau derrière le mur, ajouter du silicone et l'ancrage mural dans le trou. Fixer le support mural en place utilisant le vis fournis, puis utiliser le clé Allen pour dévisser le support du bras du support mural. Insérer le bras horizontal dans le support du bras.

Retirar el brazo de soporte horizontal y marcar el orificio en el soporte de pared. Perforar el orificio con una broca de Ø6 mm y, si no hay un montante detrás de la pared, aplicar silicona e insertar un anclaje en el orificio. Atornillar el soporte de pared en su lugar, luego usar la llave Allen para aflojar el soporte del brazo del soporte de pared. Insertar el brazo horizontal en el soporte del brazo.

6A

Parts required:

Pieces requis:

Partes requeridas:

Place the support arm with the fixed panel bracket onto the fixed panel. Slide the arm bracket over the wall bracket. Pre-drill the support arm using a Ø4mm drill bit, then insert the screw into the horizontal arm. Tighten the Allen screws on the fixed panel bracket. Insert the fixed panel bracket cover into the fixed panel bracket. Add wall jamb cover

Placer le bras horizontal avec le support du panneau fixe sur le panneau fixe. Glisser le support du bras sur le support mural. Percer le bras avec un mèche Ø4mm, puis insérer la vis dans le bras horizontal. Visser tous les vis Allen sur le support du panneau fixe et du support du bras. Insérer le couvercle du support du panneau fixe sur le support du panneau fixe. Ajouter le couvercle du montant mural

Colocar el brazo de soporte con el soporte del panel fijo sobre el panel fijo. Deslizar el soporte del brazo sobre el soporte de pared. Pretaladrar el brazo de soporte con una broca de Ø4 mm, luego insertar el tornillo en el brazo horizontal. Apretar los tornillos Allen en el soporte del panel fijo. Insertar la tapa del soporte del panel fijo en el soporte del panel fijo. Insertar la cuvierta del montante mural en el junta del montante mural

Parts required:
Pieces requis:
Partes requeridas:

Add wall jamb cover. Silicone the outside edges of the panel.

Ajouter le couvercle du montant mural. Siliconer les bords extérieur du panneau

Insertar la cubierta del montante mural en el junta del montante mural.
Aplicar silicona en los bordes exteriores del panel.

24H

Wait 24 hours before using the shower.

Attendre 24 heures avant d'utiliser la douche.

Espere 24 horas antes de utilizar la ducha.

4B

Parts required:

Pieces requis:

Partes requeridas:

Place pivot arm over the fixed panel. Ensure the pivot arm is level. Trace outside the pivot wall bracket. Unscrew the pivot arm from the pivot wall bracket. Mark the position of the hole in the pivot bracket. Drill with a 6mm bit into the wall. If there is no stud behind the wall, insert silicone and wall anchor into the hole.

Placer le bras pivotant sur le panneau fixe. Assurer le bras pivotant soit de niveau. Tracer l'extérieur du support mural du bras pivotant. Dévisser le bras pivotant du support mural du bras pivotant. Marquer la position du trou dans le support mural du bras pivotant. Perforer un trou utilisant une mèche de Ø6mm dans le mur. S'il n'y a pas de poteau derrière le mur, insérer du silicone et un ancrage mural dans le trou.

Colocar el brazo pivotante sobre el panel fijo. Asegúrase de que el brazo esté nivelado. Trazar el contorno exterior del soporte de pared del pivote. Desatornillar el brazo pivotante del soporte de pared. Marcar la posición del orificio en el soporte del pivote. Perforar la pared con una broca de 6 mm. Si no hay un montante detrás de la pared, aplicar silicona e insertar un anclaje de pared en el orificio.
