

INSTALLATION INSTRUCTIONS

LARGE BASKET STRAINER

MODEL No's: I20

Recommended installation by a Professional Plumbing Contractor

1. Disconnect and remove existing flange / strainer assembly from drain pipe.
2. Place the drain flange in sink hole.
3. Attach flange nut to underside of flange, using o-ring and washer to seal the sink hole.
4. Test seal by engaging strainer into flange and adding water. Make adjustments as required.
5. Attach flange to existing tailpiece drain pipes with slip nut provided. Remove strainer from flange and drain water from the sink.
