## TECHNICAL DESCRIPTION

Material	Machined from solid brass rod (size 25 to 63 mm) or solid bronze (sizes 75 to 125 mm)
----------	---

SDR11 compression-sleeve fittings are intended for heating, snow and ice melting and hydronic distribution, when used with RAUPEX® PEXa pipes. Dual adapter fittings connect RAUPEX pipe to other threaded piping systems (first size) or copper pipe (second size). Make threaded or solder connection before connecting to RAUPEX pipe. REHAU recommends threaded connections to be accessible for periodic inspection.

Installation is performed with SDR11 compression-sleeve tools. Tapered end of sleeve installs toward fitting. Follow all published installation instructions. Not certified for potable water.
