IMPORTANT:

- To ensure this product is installed properly, you must read and follow these guidelines.
- The owner/user of this product must keep this information for future reference.

- Anti-scald protection is the responsibility of the installer and according to applicable codes
- Be sure your installation conforms to all federal, state, and local codes. In the State of Massachusetts, all installations must comply with the rules and regulations set forth within 248 CMR.
- Wall valves control on/off/volume and must be installed for each fitting that will have water flowing to it. If using a wall valve with the Universal 1/2" Thermostatic Valve (**STYLE No.** GUTH56R), refer to the Installation Guidelines for the Thermostatic Valve which contains related installation information.
- This product must be installed by a professional licensed contractor and must be on-site prior to rough-in. This allows the installer to visualize the installation.
- Refer to the specification and assembly drawings attached. Product is sold partially assembled but shown fully disassembled for illustrative and service purposes only.
- Inspect this product to ensure you have all parts required for proper installation.
- Use only a strap wrench or protected/smooth-jaw wrench on any finished surface.

TRIM INSTALLATION WITH CONTROL VALVE:

1. Remove the tile guard and make a mark on the tube that is a 1/2" from the surface of the finished wall.
2. Remove then cut the tube at the mark made in Step 1. DO NOT cut the end of the tube with the internal threads. See Figure - 01.

These guidelines have been prepared for the professional contractor to aid in the installation of:
ROADSTER VOLUME CONTROL VALVE TRIM METAL CROSS HANDLE (STYLE No. RDVC40) AND METAL LEVER HANDLES (STYLE No. RDVC50).
All dimensions are based on origin specification and are subject to change and variation. Please consult your Design Associate for current specifications.

3. Mark then cut the cartridge stem $1\frac{3}{8}$ " from the surface of the finished wall. See Figure - 02.

4. Re-install the threaded tube onto the valve.
5. Hold the escutcheon (8) to the finished wall then thread the gland cover (7) onto the threaded tube to hold the escutcheon against the finished wall. Make sure the washer (9) is behind the escutcheon.
6. Remove the indice (2) and screw (4) from the handle (1 or 5) then place the handle over the cartridge stem in the desired orientation.
7. Thread the screw into the cartridge stem to fix the handle then re-install the indice.

TRIM INSTALLATION WITH DIVERTER VALVE:

8. Remove the tile guard and make a mark on the tube that is $\frac{5}{8}$ " from the surface of the finished wall.
9. Remove then cut the tube at the mark made in Step 8. DO NOT cut the end of the tube with the internal threads. See Figure - 03.
10. Mark then cut the cartridge stem $1\frac{1}{2}$ " from the surface of the finished wall. See Figure - 04.
11. Re-install the threaded tube onto the valve.
12. Hold the diverter plate† (SOLD SEPARATELY) and escutcheon (8) to finished wall then thread the gland cover (7) onto the threaded tube to hold the escutcheon and plate against the finished wall. Make sure the washer (9) is behind the escutcheon.
13. Remove the indice (2) and screw (4) from the handle (5) then place the handle over the cartridge stem in the desired orientation.

14. Thread the screw into the cartridge stem to fix the handle then re-install the indice.
